Having an ORCID iD will benefit you!

✓ Stays with you throughout your career
✓ Improves discoverability, and thereby increases citation rates
✓ Connects your research outputs including manuscript submissions, grant applications, and patent applications
✓ Eliminates name ambiguity to easily and uniquely distinguish you from other researchers
✓ Saves time: ORCiD integration in publisher workflows and in grant submission processes reduces redundant entry of biographical and bibliographical data in multiple systems

Follow these steps to get your ORCiD record completed:

- Go to [https://rmdb.research.utas.edu.au/rmdb/warp/q/indiv_prefs_warp_ko](https://rmdb.research.utas.edu.au/rmdb/warp/q/indiv_prefs_warp_ko) and click on ‘Click to create or authenticate your ORCID ID’
- You will be taken to the WARP ORCiD Integration page
- Use the buttons to:
  1. Authorise WARP to access your ORCiD record:

```
[Authorise]
```

Use the link below to authorise WARP to access your ORCiD record. This means that you will be able to upload publications, add to and modify your ORCiD record from within WARP. If you do not have an ORCiD record you can easily create one from here as well.

![Create or Connect your ORCiD ID](#)

This tick box authorises WARP to access your ORCiD record (you only have to authorise once):

![University of Tasmania WARP has asked for the following access to your ORCiD Record](#)

Create or update your activities

- Allow this permission until I revoke it.

Make sure your ORCiD is visible 📺.
2. Upload your WARP publications to your ORCiD record:

A list of your WARP publications will appear. The list will show what ‘Exists’ in your ORCiD record currently, and what is ‘Not Found’ in your ORCiD record. Upload all or a selection of publications using the tick boxes and the 'Upload' button. The system will automatically check for and prevent duplicate records from appearing in your ORCiD record.

3. Upload your WARP Funding records to your ORCiD record:

This works in exactly the same way as for Publications, but for WARP Funding records.

4. View your public ORCiD record:

5. Make the most of your ORCiD by:
   ✓ Entering any name variants.
   ✓ Entering University of Tasmania under Education and/or Employment.
   ✓ Add keywords describing your research interests/activities/expertise.
   ✓ Include URLs for other websites/identifiers related to your research role e.g. Scopus AuthorID, ResearcherID, your University web profile, Google Scholar Citations.

6. Use it!
   Once you’ve signed up, you can start using your ORCID iD immediately, for manuscript submission, grant submission (where applicable) and wherever else the option is available.
   Update your ORCiD record regularly to reap maximum benefits and save precious time.
